

We are thrilled to announce our new medication review program!

Now is the time to take control of your health

**Personalized medication care, with a true second opinion**

Meet one on one with a clinical pharmacist by video or phone. We complete an advanced assessment, confirm indications, check organ function and interactions, and deliver a clear plan you can share with your prescriber. For complex cases, we

also advise when pharmacogenomic testing is likely to change the drug or dose, then interpret results alongside clinical context.

Ideal for health leaders seeking clarity for themselves or a family member, and an innovative program offering for recently discharged patients with multiple changes. Fewer trial-and-error switches, safer therapy, documented recommendations.

## Presentation at AFHTO!

We were thrilled to attend the AFHTO Conference!

We are very proud to share that two of our talented team members, Paula Newman and Glenys Vanstone, presented an impactful session on collaborative care in remote and rural communities.

**Presentation Title:** *A Remote Pharmacist Medication Management Program in Collaboration with Patients, Prescribers and Community Pharmacists to Support the Care of People with Diabetes in an Indigenous Community*

This session showcased innovative approaches to medication management and community collaboration—it was not to be missed!
